PROJECTS

Citizen charter Portal [🔗](#)

Architected and deployed a full-stack citizen engagement platform for the Addis Ababa Traffic Management Authority, enabling seamless complaint submissions, service ratings, and feedback tracking via Next.js/React frontend (TypeScript), Express.js backend, and SQL database.

Derma Scan [🔗](#)

Engineered DermaScan, an AI-powered dermatology web app (for skin cancer risk estimation through photo uploads and symptom analysis—leveraging Next.js for responsive UI, Nest.js for secure APIs, and PostgreSQL for data management; delivered confidence-scored recommendations, clinic referrals, and privacy-first community sharing to empower early detection for users.
